

Test Cases : Query String

Input	Action	Expected Result
New QueryString(name=Alice&age=19&country=UK)	getParameter("name")	Alice
New QueryString(name=Alice&age=19&country=UK)	getParameter("age")	19
New QueryString(name=Alice&age=19&country=UK)	getParameter("country")	UK
New QueryString(name=Alice&age=19&country=UK)	getParameter("occupation")	Null
New QueryString(name=Alice&age=19&country=UK)	getParameter("Alice")	Null
New QueryString(name=Alice&age=19&country=UK)	getParameter("&")	Null
New QueryString(name=Alice&age=19&country=UK)	hasParameter("name")	True
New QueryString(name=Alice&age=19&country=UK)	hasParameter("age")	True
New QueryString(name=Alice&age=19&country=UK)	hasParameter("country")	True
New QueryString(name=Alice&age=19&country=UK)	hasParameter("occupation")	False
New QueryString(name=Alice&age=19&country=UK)	hasParameter("Alice")	False
New QueryString(name=Alice&age=19&country=UK)	hasParameter("&")	False
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset("name")	0
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset("age")	11
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset ("country")	18
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset ("occupation")	-1
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset ("Alice")	-1
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset ("&")	-1
New QueryString(name=Alice&age=19&country=UK)	getParameterOffset("age") > 0	True
"Hello%2C+world%21"	QueryString.decode(Input)	"Hello, world!"
"I'll+be+a+CEO%21"	QueryString.decode(Input)	"I'll be a CEO!"
new QueryString("");	hasParameter("name")	False
new QueryString("");	getParameter("name")	Null
new QueryString("");	getParameterOffset("name")	-1
